Chapter 1. Sum Up

What is addition of numbers

Here you will learn what is addition.

To successfully perform the task of sum up numbers, you must know what is addition: Addition is a mathematical operation; it is a process or action that you do with numbers. Addition allows you to sum up 2 numbers.

You use the plus (+) button to express the addition operation in the app.

In the addition process, we take a number and add it with another number.

How To Sum up Numbers

Here you will find instruction about using the addition feature of JPS Calculator app

To successfully sum up numbers, you must know what is addition.

1. Enter the first number.
2. Choose the plus (+) button.
3. Enter the second number.
4. Choose the equal (=) button.

The result from the addition is displayed.

You want to subtract 3 and 2. The equation will look like: $3+2=5$. You enter 3. Press plus. Enter 2. Press equals. The result 5 appears on the screen.

Chapter 2. Subtract

What is subtract of numbers

Here you will learn what is subtraction.

To successfully perform the task of subtracting numbers, you must know what is subtraction:

"Subtraction is a mathematical operation; it is a process or action that you do with numbers. Subtraction allows you to find the difference of 2 numbers.

You use the minus (-) button to express the subtraction operation in the app.

In the subtraction process, we take a number and reduce it to a smaller number. That is, we take away one number from another.

How to Subtract Numbers

Here you will find instruction about using the subtraction feature of JPS Calculator app

To successfully subtract numbers, you must know what is subtraction.

1. Enter the first number.
2. Choose the minus (-) button.
3. Enter the second number.
4. Choose the equal (=) button.

The result from the subtraction is displayed.

You want to subtract 2 from 3. The equation will look like: $3-2=1$. You enter 3. Press minus. Enter 2. Press equals. The result 1 appears on the screen.

Chapter 3. Multiply

What is multiplication of numbers

Here you will learn what is multiplication.

To successfully perform the task of multiplying numbers, you must know what is multiplication: Multiplication is a mathematical operation; it is a process or action that you do with numbers. multiplication allows you to multiply 2 numbers.

You use the plus (x) button to express the multiplication operation in the app.

In the multiplication process, we take a number and multiply it to another number.

How to Multiply Numbers

Here you will find instruction about using the multiplication feature of JPS Calculator app

To successfully multiply numbers, you must know what is Multiplication

1. Enter the first number
2. Choose the multiply (x) button
3. Enter the second number.
4. Choose the equal (=) button.

The result from the multiplication is displayed.

You want to multiply 2 and 3. The equation will look like: $2 \times 3 = 6$. You enter 2. Press multiply. Enter 3. Press equals. The result 6 appears on the screen.

Chapter 4. Divide

What is division of numbers

Here you will learn what is division.

To successfully perform the task of dividing numbers, you must know what is division: Division is a mathematical operation; it is a process or action that you do with numbers. Division allows you to divide 2 numbers.

You use the plus (\div) button to express the division operation in the app.

In the division process, we take a number and divide it by another number.

How to Divide Numbers

Here you will find instruction about using the Division feature of JPS Calculator app

To successfully divide numbers, you must know what is Division

1. Enter the first number.
2. Choose the divide (\div) button.
3. Enter the second number.
4. Choose the equal (=) button.

The result from the division is displayed.

You want to divide 6 by 2. The equation will look like: $6 \div 2 = 3$. You enter 6. Press divide. Enter 2. Press equals. The result 3 appears on the screen.
